

RADIAN® TRU-17™ MAGAZINE BASE PAD

▷ FOR SIG SAUER® P365-XMACRO™

INSTALLATION INSTRUCTIONS

STEP 01 | Remove the OEM base plate by depressing the detent in the center of the plate with a punch or similar tool. With the detent depressed, apply pressure to the rear of the base plate. The base plate should slide off the front of the magazine.

STEP 02 | With the OEM base plate now removed, depress the spring and detent plate while aligning the RADIANT TRU-17 Magazine Base Pad with the rails on front of the magazine. Slide the TRU-17 Base Pad towards the rear of the magazine until the detent snaps into place.

NOTE | The TRU-17 Base Pad was designed to have a small gap on the back of the magazine between the bottom of the magazine and the base pad. The additional space allows consistent 17 round loading, every time.

REMOVAL | To remove the TRU-17 Magazine Base Pad, depress the detent in the center of the plate with a punch or similar tool and apply pressure to the rear of the baseplate. The TRU-17 Base Pad should slide off the front of the magazine.

Magazine not included.
